

Introduction to Reload

GWAVACon

P. Taylor Cochrane

Director, Product Management

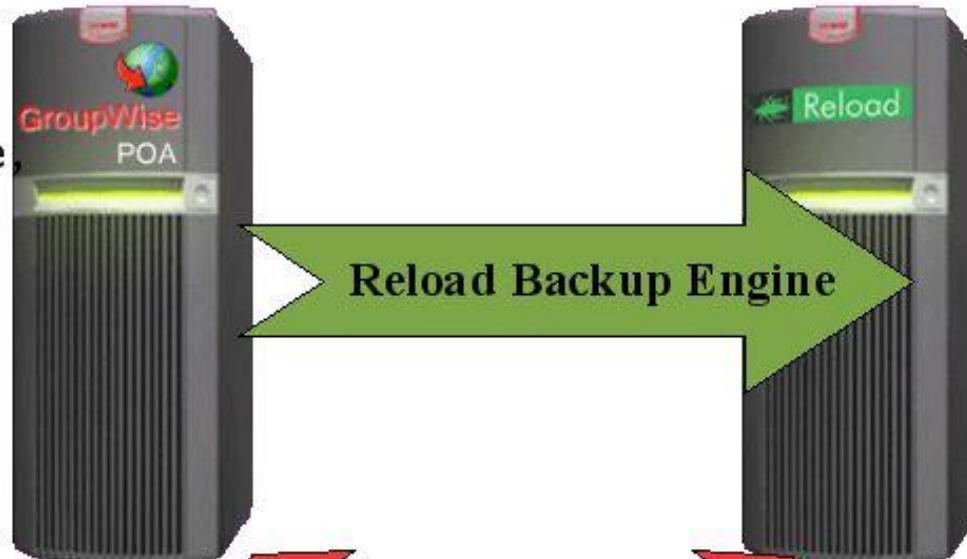

tc@gwava.com

How Reload Works

GWAVACon

GroupWise POA
- running on NetWare,
Linux, or Windows

Reload

- Taking periodic backups
- Requires much less space than standard backups
- Easy to Access via GroupWise Client

GroupWise Client normally accesses POA
Can switch over - access Reload - Recover Mail
and go back to normal Access

Tay Kratzer

GWAVACon

- Reload Developer

- Novell Master CNE

Superior Hot Backup

GWAVACon

- GroupWise SmartPurge Integration
- All Items are Backed Up
- Backup Speeds are Very Fast
- Only 12% of the Size of the Post Office is Replicated and Stored
- On Disk, it Just Looks like a GroupWise Post Office
- Reload Backups are Immediately Usable for Data Restore or Disaster Recovery
- No Software is Installed to the Production Servers!
- Backs up GroupWise on any Platform

Quickly Restore Data

GWAVACon

- Native GroupWise Access to Backups in 1 Minute
- Restore any Message Item (Mail, Calendar Items, etc.)
- Restore Address Books
- No Software to Install to Clients
- Platform Independent Solution

Disaster Recovery

GWAVACon

- Push-Button Disaster Recovery
- Be up and Running on the Reload Server in 2 Minutes
- No Backup Sets to Combine, no Decisions to Make, Just Push the “Failover” Button, That’s It!
- Disaster Recovery for GroupWise Post Offices and Domains

Other Features

GWAVACon

- Intra-day backups
 - Still only 12% a Day Stored on Disk
 - Chicago Law Firm Performing Backups Every Two Hours from 6:00 A.M. to 10:00 P.M.
- Concurrent Backups
 - Small Backup Windows
- **Worry Free**
 - A Consolidated Daily Status Report e-mail
 - Warning and Error Thresholds for Proactive e-mail Notification
 - At-a-Glance Monitoring

- Reload Mobile
 - Administration on the Road
- Call custom commands at certain job states
 - So you have some cool idea, go ahead!
- Add custom links to the Web Interface
- Lots of default parameters that can be changed and fine-tuned

New in Reload 3.1

GWAVACon

- Compatible with GroupWise 8.0.1 and SLES11
- Increased Reload's Ease of Use (UI layout, screen order, increased help documentation)
- Added support for DNS based connectivity for backups of post offices and domains
- Significantly enhanced the Migration features of Reload (very useful for customers migrating to Linux)
- Added intelligent job queuing to favor getting backup jobs done first before performing maintenance type jobs
- Strengthened Reload's ability to detect and recover from failed backup attempts

Demo Time!

GWAVACon

Onto Live demo...
