# Vertigo Concept

GWAVACon

Why should an administrator use Vertigo and not ConsoleOne/iManager?

- Vertigo common administration tasks
  - Single User Mode
    - Create New User or Object, User Properties, Password Change, Rule Copy, Signature Copy, Proxy Access, Folder Copy, Disable Logins
  - Multi-User Mode
    - Generating Reports, User Properties, Disabling or Deleting Rules or Signatures, Proxy Access
- How?
  - Novell Client, Object API, SOAP

# Lab 1: Object Copying

GWAVACon

- Goals
  - Copy GroupWise rules to multiple users
  - Copy signature to multiple users
  - Copy folders to multiple users

# Lab 2: Proxy Access Management

GWAVACon

- Goals
  - Grant Proxy access to multiple users
  - Change the proxy access rights for those users
  - Generate report on Proxy Access relationships

# Lab 3: User Management

GWAVACon

- Goals
  - Create new user
  - Disable multiple accounts
  - Change user properties for multiple users
  - Generate reports
    - Disk Space Management
    - Junk Mail Lists
