

GWAVA Cloud Messaging Security

Reduce Costs - Manage Complexity - Mitigate Risk

GWAVA Cloud Messaging Security makes your email servers more secure, compliant, and productive. SPAM is blocked before reaching users inboxes eliminating wasted time spent on unwanted email.

Email threats such as viruses, worms and phishing scams are eradicated before they reach your organization ensuring confidential and proprietary information remains safe. Assign email security policies to ensure legal and regulatory compliance for both inbound and outbound email access.

Multi-tiered Protection

Multiple scanning engines with “zero-hour” anti-virus updates immediately protect messages from up-to-the-minute attacks.

- Robust Content Filtering - Subject, header, body, Raw MIME, finger printing, attachment, IP
- Multiple-engine anti-virus - Signature, SURBL, RBL, IP Reputation, SPF
- Zero-day live protection - Live hourly updates to ensure protection from mutating viruses

Message Management

Identify immediate threats and security holes while maximizing user productivity and messaging capabilities.

- Surveillance - Monitor sensitive personal communications (i.e. SS#, CC#, etc) Rule-based notification and reporting.
- Statistics & Reports - IT administrators and C-level reporting
- Quarantine & Digest - End-user access to quarantine and daily digest maximizing employee productivity

Rapid Deployment

Reduce implementation costs by simply pointing your messaging servers to GWAVA Cloud Security Services and you are up and running.

- Pre-defined Protection Packages - Use our pre-set rules for maximum protection, customize as you go.
- Award Winning Support - 24x7 access to GWAVA certified technicians
- Scalable access - On demand availability of server and network usage
